

This guide will demonstrate how to access the Kaltura My Media Gallery outside of a Course Shell.

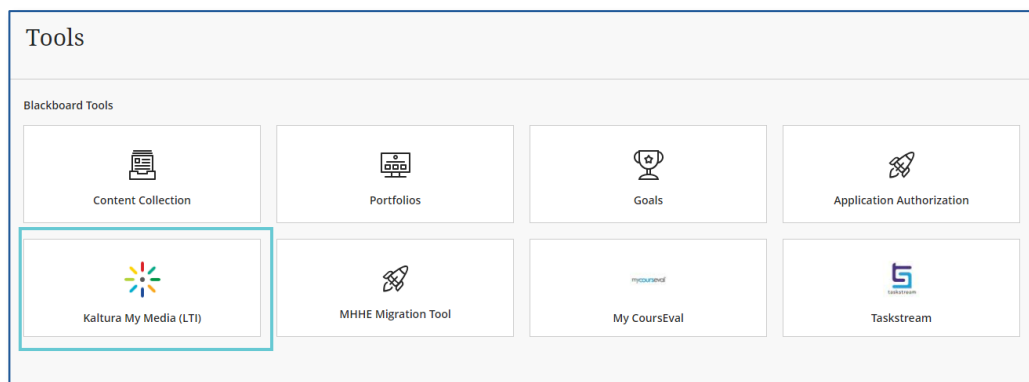

Opening [Kaltura My Media \(LTI\)](#) grants access to your entire collection of media uploaded to Kaltura. Here, you can manage your content by adding, modifying, or removing items.

Access your content by following the below instructions:

1. Launch Blackboard and navigate to the left-hand side of the screen, then select [Tools](#).

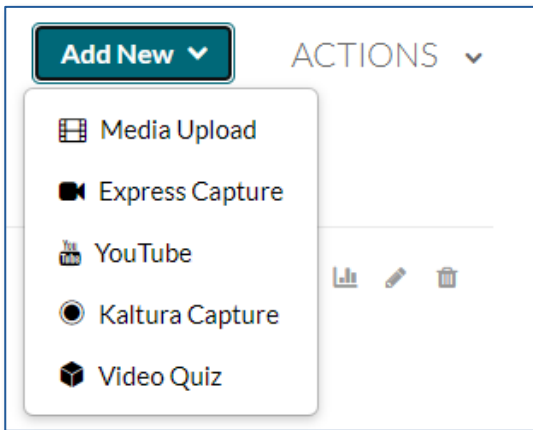

2. Access your media library by clicking on [Kaltura My Media \(LTI\)](#) to explore content beyond your course environment.

3. Selecting "Add New" from the "My Media" page will display the various types of content creation options available.

Accessing My Media Gallery Outside of a Course Shell

Media Upload: Upload media from your device

Express Capture: Kaltura Express Capture enables recording content directly from a browser without the need to install any additional software.

YouTube: add media from YouTube, replace YouTube links, and obtain analytics for YouTube entries.

Kaltura Capture: Kaltura Capture desktop recorder is a super easy-to-use tool for recording videos and capturing your screen.

Video Quiz: Video Quiz allows creators to add multiple-choice, True / False, and open-ended questions into videos using an intuitive editor.
