Randomize Test Answer Order

If you choose to randomize the order of answers for a test question, the answers will be shown in a different order every time the test is taken. This may be helpful to deter cheating.

1. Click the grey arrow next to the multiple-choice test you would like to randomize the test answers for and click **Edit the Test** (Figure 1).

2. Click the grey arrow next to a multiple-choice question and click **Edit** (Figure 2).

3. On the next page, make sure the option **Show Answers in Random Order** is checked off. Repeat this for each multiple-choice question you would like to be randomized (Figure 3).

OPTIONS

If partial credit is allowed, each incorrect answer can specify what percentage of the total points should be given for that answer.

- **Answer Numbering**: None
- **Answer Orientation**: Vertical
- **Allow Partial Credit**: 
- **Show Answers in Random Order**:
